

**Montana Fish,  
Wildlife & Parks**

**Addendum #1 To RFP #100133**

**Request for Proposal Questions and Responses for the Field Evaluation of State  
Migratory Bird Stamp Program Project**

**Deadline for Written questions: 12 PM March 22, 2010**

**Question and Answer period is now closed.**

1) What is the project budget?

**Response:**

**\$96,000 for the life of the 3 year project.**

2) How many firms were notified of this RFP?

**Response:**

**The RFP was posted on the State of Montana website for anyone to see. There were roughly 40 vendors notified via the State automatic notification system and 7 vendors were sent the RFP directly. These vendors were requested by the Project Manager as possible interested parties.**

3) Section 3.2 Contractor Responsibilities, page 11, sixth bullet point states that the "Contractor must contact landowner to inform them of evaluation activities on their land and to seek permission for access." How many different land owners will need to be contacted in each of 2010, 2011 and 2012?

**Response:**

	<b>%Federal</b>	<b>%State</b>
<b>2010: 45 Landowners</b>	<b>12</b>	<b>21</b>
<b>2011: 86 Landowners</b>	<b>30</b>	<b>13</b>
<b>2012: 19 Landowners</b>	<b>3</b>	<b>41</b>

4) Section 3.2 Contractor Responsibilities, page 11, seventh bullet point, and Section 4.1.3 Ability to Meet Supply Specifications, subsection C, Page 14, reference and electronic Wetland Evaluation (Microsoft Word) Form, which is provided as a filled in form on pages 23 and 24 of the RFP. Would the State please make available the Microsoft Word version of this form, in addition to the PDF, so that the contractors can understand how the form actually works?

**Response:**

**See other attached forms**

5) Section 3.2 Contractor Responsibilities, page 11, third bullet point, references a mandatory, half-day training session. Where will the half-day training occur? Is the mandatory training repeated each year, or will it just occur the first year?

**Response:**

**Half-day training session will occur at the Helena FWP Headquarters office only for the first year**

6) 4.1 Section 4.2.1 Resumes/Company Profile and Experience, page 13, mandates that bidders provide a copy of “a completed monitoring report, land management report or (other) contract monitoring document completed within the last 5 years.” May we submit a copy of a pertinent report as a PDF on a CD?

**Response:**

**Yes, a CD in a PDF format is acceptable in the required number of copies. This report is the only acceptable item in this format. The rest of the proposal must be in hard copy form with the required number of copies submitted.**

7) Appendix C: Migratory Bird Stamp Program Wetland Evaluation Form, question 5; General wildlife observations, page 23, seems straight forward but begs the question of intensity of the survey effort. This question requires a list of ducks and geese, shorebirds, and other wildlife. Is FWP looking for: a general approximation of what is observed, say, from the top of the dam; a marginally detailed list compiled from several points around a wetland; or, a detailed census based upon walking around the entire wetland and spending several hours at a site? In short, what should be the intensity of the wildlife survey effort?

**Response: FWP is looking for a general list of species and approximate abundance. That is, as the contractor performs other evaluations on site, the contractor will take note of what is seen. This is not intended to be an intensive wildlife survey and it is not intended to be a census of the entire wetland. FWP realizes this can take a lot of time if completed in an intensive fashion. Given the difficulty and variability of survey effort and timing, this list is intended to provide general observations.**

8) Page 13, Section 4.1.3.A: On “up to 30 additional points will be based on a history of consistently completing work items on schedule”: How do we demonstrate this through the RFP? Do we list projects that were completed on time?

**Response: This will be demonstrated by considering materials provided by the applicant and information from references.**

9) Page 13, Section 4.1.3.B and C: What does “other materials” included in reference to evaluation of specific skills and abilities?

**Response: “Other materials” refers to all information requested of the applicant through this RFP. Scorers will consider all information that is provided when assigning a value to these sections.**

10) Page 14, Section D: “Effectively communicate with landowners and FWP employees. Be respectful of landowner’s concerns”: How do we demonstrate this skill?

**Response: This skill will be based on information derived from references and all information requested of the applicant, including past types and extent of experience working on private lands or directly with private landowners.**

11) Section 4.1.4, Page 14: Although maps are included, Appendix D does not contain the list of wetland sites and their type and size, as referenced in this section. Can FWP please provide that information:

**Response: Please see tables 1-3 below.**

12) Section 3.2, Page 11: What is FWP’s direction to contractors in the event that landowners deny access permission altogether or delay access until after July 10?

**Response: If a landowner does not allow access, the contractor will no longer need to pursue evaluating those affected projects.**

13) Section 3.2, Page 11: Has FWP shot aerial photographs of any of the wetland sites? If so, are they available for use by the contractor?

**Response: FWP has not shot aerial images. However, maps will be provided by FWP for each wetland site that includes a BLM base map and aerial image using natural color NAIP.**

14) Section 4.1.2, Page 13: Does the offerer need to provide only one copy of the sample monitoring report along with the submittal package, or do they need to provide a sample of the monitoring report along with each copy of the proposal (4 copies)?

**Response: If the offerer is providing a paper hard copy of the report, only 1 copy of the sample report is required. If the report will be provided in a CD, please provide 4 copies of the CD. Report must be a completed monitoring report, land management report or some form of contract monitoring document completed within the last 5 years.**

15) 3.3 Agency Responsibilities pg. 12: Experience has shown that Landowner Contact information and some landownership has changed since the original contracts were written. Is the contact information that is provided by the State current and if not, is the Contractor responsible for getting the information from the courthouse records?

**Response: Contact information is based on current cadastral data from the Department of Revenue. It is correct that some of these landowners are different than those who signed original contracts. FWP will do its best to provide up to date landowner information, including incorporating any corrected information from landowners themselves who may respond to letters received from FWP.**

16) 4.1.4 Methods of Providing Services pg 14: The RFP indicates that Appendix D includes a list of wetland sites, type and size for each year. The information provided only shows general location in the county and number of projects but nothing more specific.

**Response: Please see tables 1-3 below.**

17) Appendix B: Contract. Services and/or Supplies pg 18. This section is inconsistent with the scope of work detailed in the RFP. Baseline reports and format are specific to the Conservation Easement part of the Habitat Montana program.

**Response: This was mistakenly left from an earlier RFP. The text should read “contractor will locate and evaluate past Migratory Bird Stamp wetland projects using a standard form provided by FWP”.**

18) Consideration / Payment 5.1 Payment Schedule pg 18. This makes reference to the baseline report and format. The RFP specifies dates for summary and final reports which should be the payment schedule to be consistent.

**Response: This too was mistakenly left from an earlier RFP. The text should read, “As contractor evaluates Migratory Bird Stamp wetland projects during the designated evaluation period, State shall pay contractor on a monthly basis upon receipt of a proper invoice, which includes number of projects evaluated. State will retain 25% of annual bid until receipt of approved annual report.”**

19) Required Insurance 9.5 Specific Requirement for Automobile Liability pg 19. The State has waived this requirement in the past for contractors doing this type of work. Will the \$1,000,000 liability level be required?

**Response: The State will require this insurance. However, the level required will be \$300,000 per occurrence and \$600,000 aggregate.**

20) Appendix D. Migratory Bird Stamp Wetland Evaluation Schedule and Maps of Locations pg. 29 Evaluation Sites for 2012 Field Season (Note) This indicates Powder River is a county for review however it is included in the 2010 review. I was unable to determine the location of the 71 projects from the maps that were provided. The other maps were consistent but this appeared to be missing over 20 project sites even if the Powder River sites were included.

**Response: This is a mistake. Please use the following notation for the map on page 29: (Note: 20 sites occur on Ninepipes Wildlife Management Area and 16 sites occur on one point approximately 2 miles north of Ninepipes WMA, both in Lake County; 9 wetland sites occur in Powell County, reflected as two points; 8 wetland sites in Beaverhead County are also represented with 2 points.)**

21) Is it possible to get more information on the sites themselves such as tabular data to accompany the large location maps provided, with attributes such as size, feature type, public or private land, landowners, etc.? Also do you know how many possible landowners will be involved?

**Response: Please see tables 1-3 below.**
